To whom it may concern,

I am writing in reference to my client, Kailey Stark (legal name Carson Stark), DOB 12/26/2001. I have been treating Kailey since March of 2018. She has been diagnosed with ADHD and is currently taking medications to help reduce the impact any symptoms may have on her work. Despite her work on implementing strategies we have discussed in therapy and the medication; she still has some difficulties related to her disability. As such, I am recommending that she be considered for accommodations that UT may have available to her to help aid in her academic success. Please feel free to contact me with any questions you may have. Thank you.

Kindly,

A handwritten signature in black ink, appearing to read "Kelly Peyton". The signature is fluid and cursive, with the first name "Kelly" and last name "Peyton" clearly distinguishable.
